Hydroblaster™ - Hydropad™ - Hydrokleen™

Hydropad Portable Wash Rack

The Hydropad Portable Wash Rack is an all steel above ground platform designed to collect water and solids from washing processes. The collected effluent is then diverted to the Hydropad's gutter system where solids/liquid separation occurs. Collected fluid is discharged for recycling back to the wash process, or to any discharge point. Solids are collected in the side gutter for disposal where they can be manually removed or automatically removed via a drag conveyor.

Multiple Hydropads can be connected linked side to side and end to end with other Hydropads to create any desired size of Wash Rack. The increased flexibility and weight loading capacity of a Hydropad make them a much better option than a concrete wash pad.

Standard Features:

- Corrugated Non-Slip Surface
• Configurable Side Gutter
• Gravity Flow Through Design
• 8' Length
• Width Ranges from 8 – 20 feet
• Forklift Access Points

Optional Features:

- Side Walls
• Sliding 4th Wall Enclosure
• Tilt Tray Gutter Cleanout
• Drag Conveyor Automated Gutter Cleanout
• Drive-in Clean-out Gutter Attachment
• Drive-on Drive-off Ramp

Specifications:

Hydropad Weights

Table with 7 columns: Tonnage/Width, 8 Foot, 10 Foot, 12 Foot, 14 Foot, 16 Foot, 20 Foot. Rows include 2 Ton, 12 Ton, 16 Ton, 25 Ton, and 30 Ton.
